

Honored Station

This year, our Grand Nature and Honored Station will be working with our Grand Hope on fundraisers for our *Hope for the Future Scholarship*. In addition, she will also be in communication with our assemblies for their scholarship fundraising event during the month of October.

In the movie Lilo and Stitch, Experiment 626 finds an unlikely home with a broken family on the Hawaiian islands. Our Rainbow family is very similar to that seen in the movie. Many of the characters are not related by blood, but they still love and support each other no matter what.

As a Rainbow family, we have taught the girls of this order many valuable lessons, such as public speaking and project planning skills. These skills make them some of the most prepared individuals when applying to college. Because of this, I want to support the girls of New Hampshire Rainbow in their educational dreams by applying more focus on our *Hope for the Future Scholarship*. College is expensive, but that should not be a reason for some of our girls to give up their college dream when they have the life skills to succeed. As a family, we need to support our girls outside of Rainbow, which is why I have chosen the *Hope for the Future Scholarship* as the focus of our Honored Station this year.
